

Track every document review project you have in Relativity – no matter where the data is hosted.

One login to track every case, every review vendor, and every channel partner.

Key Benefits

- Federated access to all Relativity server (9.7 and above) and RelativityOne instances
- Law firms, corporate legal teams, review providers and channel partners have the same information at the same time
- “Point-and-click” navigation to subsets of key documents
- Data-driven reviewer quality management

Key Features

- Track multiple projects across different Relativity instances
- Track separate projects within the same Relativity workspace
- Instantly review critical subsets of data, such as Privileged or Hot documents by utilizing quick launch tiles directly to the related documents in Relativity
- Access up-to-date charts forecasting project completion date
- Evaluate reviewer statistics to provide insight into individual and team performance
- Monitor issue tag overlap to discover review efficiencies or training opportunities to maximize consistency
- Design and implement customizable categorical budgets and connect each category to specific batch sets
